

## How to enable *AutoPaste* in *AutoTyper*

### Step 1

Download the *AutoPaste* script from:

<http://at.wegenerlabs.com/paste.scpt>

### Step 2

Open *Finder*.

Open the *Go to Folder...* pane via the *Go* menu → *Go to Folder...* or *cmd-shift-G*.

Enter the following path:

`~/Library/Application Scripts/com.wegenerlabs.AutoTyperMac`

If the folder does not exist, create it.

### Step 3

Move the script you downloaded from the *Downloads* folder to the folder you opened, *com.wegenerlabs.AutoTyperMac*.

### Step 5

Open the *System Preferences* app.

Click on *Security & Privacy*.

Click on the *Privacy* tab.

Click on *Accessibility* in the side bar.

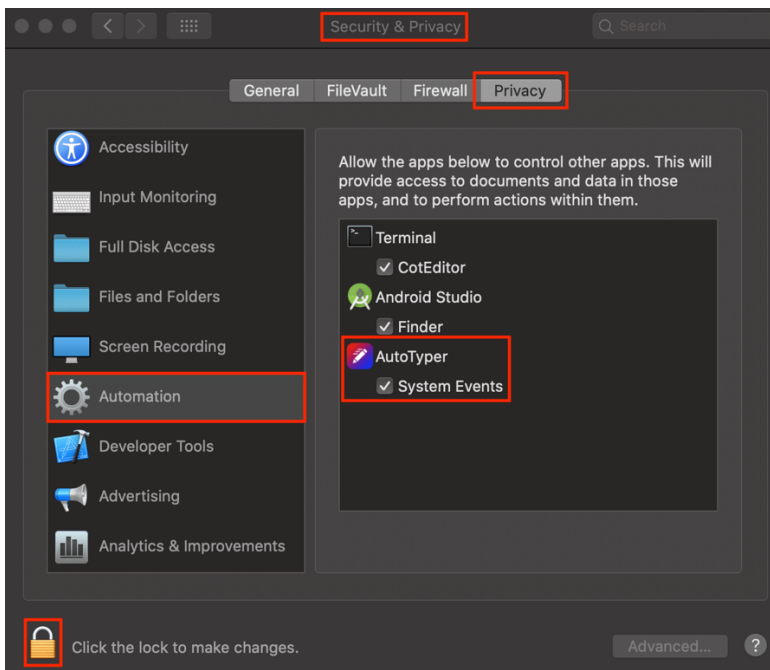

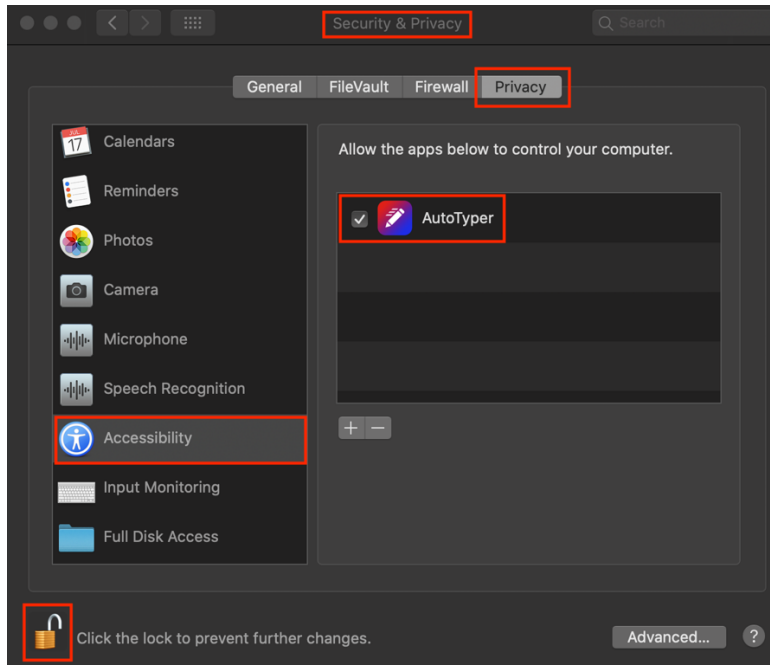

If the screen is not editable, click on the lock in the bottom left corner and enter your password to unlock the screen.

If you do not see *AutoTyper* in the table on the right, click on the plus icon, navigate to the *Applications* folder and select *AutoTyper*.

Make sure *AutoTyper* is checked.

Click on *Automation* in the side bar.

Make sure *AutoTyper* is checked.

#### Step 4

Open *AutoTyper* settings via the *AutoTyper* menu → *Settings*.

Click on the *Settings & Support* tab.

Click on *Turn on*.

Click on *Authorize* in the window that opens.

*AutoPaste* is now enabled.
